Bay-Delta Restoration Program: CALFED Water Use Efficiency Grants for Fiscal Years 2021 and 2022	USBR	The Bay-Delta Restoration Program includes strategies to address ecosystem health, water supply reliability, and water quality. Water use efficiency is a critical element in the successful implementation of the Bay-Delta Restoration Program. The goals (objectives) of the CALFED Bay-Delta Program include, but are not limited to: Goal 1: Reduce existing irrecoverable losses, increasing the overall volume of available water; Goal 2: Achieve multiple state-wide benefits; Goal 3: Preserve local flexibility; and Goal 4: Build on existing water use efficiency programs. Reclamation is posting a Notice of Funding Opportunity (NOFO) for cost-share funding for water use efficiency and conservation activities. To be eligible for financial assistance, a proposed activity must have a defined relationship to the California Bay-Delta. Through this NOFO, Reclamation provides funding for projects that increase water reliability and improve water management, including the use of expanded technologies and improved capabilities consistent with the goals of the October 19, 2018, Presidential Memorandum on Promoting the Reliable Supply and Delivery of Water in the West.	\$1.0	At least 50% matched funding requirement	Application deadlines: November 30, 2021 for FY 2022	Integrated water management	https://www.grants.gov/web/grants/view-opportunity.html?oppld=329882
Central Valley Project Habitat & Facility Improvements	USBR	The rivers of the Central Valley of California support populations of Fall Run Chinook, Spring Run Chinook, and Winter Run Chinook salmon and Steelhead Trout. Water resources development, stream channel manipulations, and other anthropogenic actions have reduced and modified historical salmonid habitats. Gravel is regularly transported from spawning sites on the river and there is less utilizable rearing habitat. Infrastructure entrains juveniles, impairs passage, and increases susceptibility to predation. Relevant purposes of the Central Valley Project Improvement Act (CVPIA) include: To protect, restore, and enhance fish, wildlife, and associated habitats in the Central Valley and Trinity River basins of California; To address impacts of the Central Valley Project (CVP) on fish, wildlife and associated habitats; To improve the operational flexibility of the CVP; To achieve a reasonable balance among competing demands for use of CVP water, including the requirements of fish and wildlife, agricultural, municipal and industrial and power contractors.	\$120.0	At least 50% matched funding requirement	Application deadline: November 30, 2021	Ecosystem restoration	https://www.grants.gov/web/grants/view-opportunity.html?oppld=335537
2021 National Fish Passage Program	FWS	The National Fish Passage Program (NFPP) is a voluntary program that provides direct technical and financial assistance to partners. The program works in partnership to provide fish (and other aquatic organisms) passage and restore aquatic connectivity for the benefit of Federal trust resources. In doing so, the program aims to maintain or increase fish populations in order to improve ecosystem resiliency and to provide quality fishing experiences for the American people. Activities that restore fish passage also support the modernization of country's infrastructure such as road culverts, bridges, and water diversions. Example project types include dam removals, culvert replacements, and the installation of fishways.	\$15.3	50% cost sharing	Application deadline: December 31, 2021	Ecosystem restoration	https://www.grants.gov/web/grants/view-opportunity.html?oppld=332399

Fund Name	Funding Agency	Description	Estimated Amount (\$M)	Cost Share	Deadline	Water Management Category	Reference
Fiscal Year 2021 Building Resilient Infrastructure and Communities (BRIC)	FEMA	The Building Resilient Infrastructure and Communities (BRIC) program makes federal funds available to states, U.S territories, federally recognized tribal governments, and local communities for hazard mitigation activities. It does so with a recognition of the growing hazards associated with climate change, and of the need for natural hazard risk mitigation activities that promote climate adaptation and resilience with respect to those hazards. These include both acute extreme weather events and chronic stressors which have been observed and are expected to increase in the future.	\$1,000.0	25% cost sharing with exceptions	Application deadline: January 28, 2022	Risk reduction	https://www.grants.gov/web/grants/view-opportunity.html?oppld=335226
Fiscal Year 2021 Flood Mitigation Assistance (FMA)	FEMA	The Flood Mitigation Assistance (FMA) program makes federal funds available to states, U.S. territories, federally recognized tribal governments, and local communities to reduce or eliminate the risk of repetitive flood damage to buildings and structures insured under the National Flood Insurance Program (NFIP). It does so with a recognition of the growing flood hazards associated with climate change ¹ , and of the need for flood hazard risk mitigation activities that promote climate adaptation and resilience with respect to flooding. These include both acute extreme weather events and chronic stressors which have been observed and are expected to increase in the future.	\$160.0	25% cost sharing with exceptions	Application deadline: January 28, 2022	Risk reduction	https://www.grants.gov/web/grants/view-opportunity.html?oppld=335214
Hazard Mitigation Grant Program (HMGP)	FEMA	The HMG program provides funding to state, local, tribal and territorial governments so they can rebuild in a way that reduces, or mitigates, future disaster losses in their communities. This grant funding is available after a presidentially declared disaster.	Program is focused on providing ad-hoc funds to individuals and governments.	25% but can vary		Risk reduction	https://www.fema.gov/grants/mitigation/hazard-mitigation
